

Alexis Bertin

Hi,

Contact: mail@alexisbertin.ca

LinkedIn: [alexis-bertin](https://www.linkedin.com/in/alexis-bertin)

I'm Alexis, a **senior Front-End and UI Developer** based in Montreal, Canada, with a background in graphic design.

Driven by a **passion for crafting immersive experiences and meaningful micro-interactions**, I found my way into coding by building these experiences from the ground up.

Over the years, I've also collaborated with larger teams to **maintain and enhance products and their design systems**, focusing on scalability while always keeping the end-user at the center of my work.

Skills

- **Sketching, building, maintaining, and scaling CSS architectures and their components** while collaborating closely with a design system team.
- **Eagle-eyed, detail-oriented UI/UX specialist**, I find satisfaction in pixel-perfect, balanced, and accessible interfaces. I thrive for the best end-user experience.
- **Learning, contributing, challenging, and driving initiatives within JavaScript environments** (React, Vue, TypeScript).
- **Proactive and collaborative**, I thrive in healthy, non-competitive and cooperative team environments.
- **Committed to clean, well-documented code**, I also am a bit nostalgic about the MacGyver'ed Internet, always craving for R&D opportunities.

Work Experience

Now

Senior UI Developer

Turbulent / Cloud Imperium Games - Launcher Team
Montreal, Canada

Contributing to the latest **Star Citizen Launcher redesign** using **Electron**, **React**, and **TypeScript**, I was also:

- Building the **UI library with Storybook** and ensuring perfect match with the Design System.
- Implementing and designing new app settings, animations and accessibility features.

Sept. 2023

Front End Developer

Turbulent - Community Team
Montreal, Canada

- Developed **React/TypeScript components** in a **Next.js**, **Apollo**, and **Styled-components** environment.
- Led UI initiatives that enhanced end-user interactions.

Feb. 2022

Technical Lead

Turbulent - Marketing Team
Montreal, Canada

- **Managed a team** of five front-end developers, **overseeing recruitment, onboarding, and training**.
- Ensured tight project deadlines while actively promoting a healthy work-life balance.
- Led and delivered critical projects under high-pressure conditions, optimizing development cycles.

Jan. 2021

Front End Developer

Turbulent - Marketing Team
Montreal, Canada

Transforming static designs into dynamic and interactive **Vue.js single-page applications** for marketing campaigns.

Oct. 2018

Sept. 2018

UI Developer

CurrencyFair
Dublin, Ireland

First UI Developer of the company, I **bridged the gap between design and engineering** and **created a custom CSS framework** in a fresh user onboarding experience using **React**.

Mars. 2017

Nov. 2016

Front End Developer

Iterate
Dublin, Ireland

Built **Drupal projects** in a fast-paced startup environment.

May 2016

Apr. 2016

UI Engineer

Propylon
Dublin, Ireland

Designed and developed user-focused solutions for .gov platforms, improving their usability.

May 2015

Education

- **2014** • Bachelor in Graphic Design

Haute École Albert Jacquard
Namur, Belgium

- **2009** • French high school diploma - IT & Management

Saint-Brieuc, France

Training

- **2021 - 2022** • Leadership & Coaching

Turbulent - AFI by Edgenda
Montreal, Canada

Completed a 10-session leadership and coaching program.
The training covered key topics such as setting mutual expectations,
handling challenging personal or professional situations,
fostering team engagement and motivation.

Interests

Things that also define me

- **Gaming**

My passion for coding was sparked by gaming.
As a teenager, I found myself more invested in building teams and
community websites, than actually playing the games they related to.

- **Cycling**

I don't own a car, I own four bikes. From winter commutes to long summer
rides, I know all the best sunset and swimming spots in Montreal.

- **Swimming**

Born and raised on the French coast of Brittany, I'm a true sea creature.
Ocean or lake, I'm very likely the first to dive in.
